

SURVIVAL FLIGHT

RN to EMT

Bridge Course

The RN to EMT bridge course is the fast-track way of allowing health care professionals who wish to advance their careers in EMS by working on a ground or air ambulance and taking their knowledge to where the action and treatment first begins. The health care professional will be allowed to do online course work over a week and then be trained by other health care providers on EMS equipment before being checked off and testing for their national certification and home state licensure.

The class is two weeks long which consists of a week of online book review of the EMT at the student's pace and an online test. Then a hands-on training the following week with other health care professional in the same field. Ride along time will be provided for those who will need it after class or with prior arrangements. Skills assessment will be June 27-29, and also the 30th (if needed) in Batesville, AR.

If this is a challenge that you have been wanting to do, contact us and let's start making a difference together!

Class fees are as follows:

\$199.00 UACCB (enrollment for online college course)

\$250.00 Survival Flight EMS (equipment fee usage and hands on instructor training)

Class size is limited and will be offered on a first come basis so don't wait!

Class enrollment is open now!!

Do the right thing Always!
